	Ending a call	① Rejecting a call ② Ending a call ③ Cancel a call ④ Voice dialing Make sure that your mobile phone accepts voice dialing. Activate the voice dialing function of your mobile phone first and record the voice commands. Press the red "Ending a call" key in standby mode. Once you hear a beep, speak the stored name and the corresponding stored number will be dialed.
	On/Off	① On Press "On/Off" for about two seconds until the sound of "DI" is heard and the words of "WELCOME" can be seeing on the mirror display. The device is on now. The device will connect to the last use mobile phone automatically. The mirror displays "CONNECTED" when connection is successful. ② Off Press "On/Off" for about two seconds until the sound of "DU-DI" is heard. All the LED is off and the mirror displays "POWER OFF", the device is off now.
	Mute/Pairing	① Enter into mute mode. Ensure the device is on first, Press" Mute/Pairing" for about two seconds until the sound of "DI-DU, DU" is heard. The LED is off quickly and the mirror displays "ENTER PAIRING", the device enters into pairing mode. Activate Bluetooth function of the mobile phone. (Refer to the mobile phone's User Guide for details.)A list of enabled devices in range will show after the process of "search "is finished. Select "DR02A" from the list on the mobile phone, enter the password "1234" to confirm the pairing process. Ensure the "" has stored in the mobile phone. The step of "Pairing" is successful when the speed of LED light is become slowly. ② Mute

		Switch the speaker cute and replay under the state of conversation.
	Volume +	Increase the volume If the speaker's volume is turned too high, the ticking will be heard.
	Volume -	Decrease the volume If the speaker's volume is turned too low, the ticking will be heard.

Note：Before using the device, you must pair the device with the mobile phone.

1 Ensure that Bluetooth of mobile and the hands free function of Bluetooth attachment are open when pairing. Press the "Receiving a call" again to connect the device and mobile by hands if the device cannot automatically connect to the mobile phone. You have about three minutes to finish the pairing process when the car kit enters into the pairing mode every time. The pairing will finish and enter into standby mode (The red LED is off and the green LED is on.) automatically when the time is over. Then, repeat the "Off" - "On" - "Pairing".

"Last number redialing" and "Voice dialing" depend on the mobile phones. Some mobile phones don't support this function. Please refer to the User Guide of your mobile phone. Ensure a voice tag has been stored in the mobile phone before using "Voice dialing".

The car kit is only use with the mobile phones which have standard Bluetooth function. Some mobile phone have no Bluetooth function or smuggled goods cannot use with the car kit.

Before using the device, you must pair and connect the device with your mobile phone. Once the pairing and connection is successful, you can carry out the step of "On" directly and miss the step of "Pairing" when you use the device and your mobile phone next time. The device will connect to the mobile phone automatically.

The car kit will disconnect with your mobile phone automatically when they were out of working range, about 10 meters. Please press the "Receiving a call" key to re-connect the car kit to your mobile phone when your mobile phone has been brought back within the working range again.

6 Charging

While standing-by or during the conversation, the device beeps every 30 sec. to indicate that batteries need charging. Please use the provided charger to charge the device. The red LED is on during charging. After charged, the red LED is off and green LED is on. Full charging period is about 4 hours (depending on the capacity of the battery).
